

I realize that chairman powell is on the payroll of the media conglomerates of this nation and anything I have to say will be like barking at the moon, that is to say pointless, but i still have to voice my opinion on this matter. By allowing a select few to have such power over the airwaves you will be furthering the decline of democracy in this nation. The propaganda that is already coming out of our media outlets is frightening and this will only get worse when only a few right wing republican media owners control the media. This is dangerous to our country and dangerous to our democracy. Do not allow this to pass.
